KAMPOL PELLETT PREMIUM

Wood pellet 6mm

Kampol Premium Pellet is made from the highest quality raw materials, guaranteeing excellent combustion parameters and high efficiency. Thanks to advanced production technologies and careful wood selection, it is characterized by low moisture content and minimal ash content.

We have an **EN plus A1**® certification, which confirms the highest quality of our product. We also have an **FSC**® certification, which attests that the raw materials used for pellet production come from responsibly managed forests.

APPLICATION

Kampol Premium Pellet is a high-quality, solid wood biomass fuel designed specifically for efficient combustion in modern boilers, fireplaces, and stoves used for generating heat energy for heating purposes. By using our pellet, you not only enjoy an effective source of heat but also contribute to the environment by utilizing a renewable energy source. Please remember that our pellet should only be used in heating devices that comply with the manufacturer's instructions and local regulations.

COMPOSITION

Kampol Premium Pellet is produced from pure, dried, and purified sawdust derived from softwood. The production process involves compressing the sawdust under high pressure. The pellet is entirely made from sawdust sourced from softwood trees. Due to the materials used and the sawdust drying technology, there may be a slight color variation in the pellets between deliveries.

TESTED CHARACTERISTIC REQUIREMENTS EN PLUS A1® KAMPOL PELLETT PREMIUM

TESTED CHARACTERISTIC	REQUIREMENTS EN PLUS A1®	KAMPOL PELLETT PREMIUM
Moisture content	<10,0%	5,9%
Ash content	≤0,7%	0,52%
Fine fraction or Fine particles	<1%	0,09%
Calorific value	Between 16.5 and 19.0 Mj/kg	17,66 Mj/kg
Bulk density	≥ 600 kg/m ³	631 kg/m ³
Abrasion resistance	≥97,5%	≥97,5%
Sulfur	≤ 0,03%	≤ 0,03%
Ash melting temperature	It must be described	≥1500°C

Results of Kampol Premium Pellet based on research conducted from 21.03.2023 to 12.04.2023.

EN PLUS A1® CERTIFICATION AND FSC®

EN plus A1® Certificate - Our Kampol Premium Pellet has obtained the EN plus A1 certification, which confirms the highest quality of our product. The EN plus A1® certificate is an international quality standard for wood pellets. This means that our pellet meets stringent requirements regarding combustion parameters, cleanliness, and efficiency. Therefore, you can be confident that by choosing our Premium Pellet, you are receiving a product of the highest quality that will provide you with efficient and environmentally friendly heating.

FSC® Certificate - We believe in sustainable forest management and environmental protection. That's why Kampol Premium Pellet also holds an FSC® certification. The FSC® certificate is an international standard for responsible forest management. It guarantees that the wood used for our pellet production comes from sustainably managed forests, with respect for the environment, local communities, and ethical principles. By choosing our pellet, you contribute to forest conservation and care for future generations while benefiting from an efficient and eco-friendly source of energy.

STORAGE

Pellets should be stored in a dry place or warehouse, in a manner that protects them from moisture, contaminants, condensation, and rainfall. Regardless of the packaging method, proper storage conditions should be ensured to maintain the quality of the pellets. Storing the pellets in other conditions may result in pellet damage, for which Kampol company is not responsible.

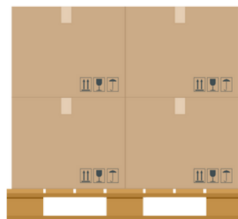

PACKAGING

1 BAG
15 KG

40 x 70 x 12

1 PALLET
1050 KG
70 BAGS

120 x 100

1 TRUCK
24150 KG
1610 BAGS
